

MANUS[™] METAGLOVES **PRO**

PRO ACCURACY

The MANUS Metagloves Pro offer unmatched precision and accuracy. Repeatability is key when capturing reliable finger data. Capturing even the smallest movements and gestures in detail is now within reach. Record or livestream this high-fidelity finger data to any application through MANUS' suite of integrations and plug-ins.

PRO USABILITY

Wear the MANUS Metagloves Pro in seconds without wasting time on sensor placement. Change between actors effortlessly with the swappable top module and immediately start capturing the vital finger data. With the simple calibration procedure and user-based calibration profiles, there is no need to re-calibrate between takes, saving valuable time.

PRO SCALABILITY

MANUS Metagloves Pro feature a swappable top module, showcasing a fully modular design. This flexibility lets you easily upgrade or replace components without needing to purchase additional modules. Customize your setup for different applications with any number of actors, ensuring long-term adaptability and cost-effectiveness in various industries.

PRO COMPATIBILITY

Our motion capture glove is fully compatible with industry standards, ensuring seamless integration into existing workflows. For advanced users, it offers an SDK with support for both C++ and Linux, allowing you to build custom integrations tailored to your specific needs. This versatility makes it ideal for a wide range of applications.
